## Seven-day access to a range of routine GP surgery appointments for Island residents

This is a two-year government pilot scheme.

GP surgeries are working together to offer GP, Nurse and some specialist clinical appointments on weekday evenings and at the weekends.

To deliver this service we are sharing resources across the Island, which means:

- the appointment may be a telephone consultation
- the appointment may be with clinicians you don't know
- you may need to travel further, as not every surgery will open every day
- your patient record will need to be shared

For more information, or to complete the patient survey, go to your surgery's website or [www.onewighthealth.co.uk](http://www.onewighthealth.co.uk) or ask about this when you next visit your surgery.
